

Dear Deloitte Technology & Transformation,

I am writing to express my interest in the Junior Consultant Future Organization position at Deloitte. I hold a Master's degree in Medical Biology from Radboud University with a specialization in Science, Management, and Innovation (SMI), and I bring practical experience in research, industry, and innovation analysis. I am committed to improving the world through modern digital technology and sustainable, innovative solutions. I am particularly motivated by Deloitte's focus on organizational transformation and agility – areas in which I am eager to grow and contribute meaningfully.

My academic background equips me with a solid foundation for this role. Having finished a bachelor's in Biology and a master's in Medical Biology, I gained extensive knowledge in the field and developed a critical mindset. Through the SMI track in the second year of my master's, I gained in-depth knowledge in sustainable innovation management, health technology assessment (HTA), market research, business models, value propositions, and health economics. It was reinforced by hands-on experience in real-world projects such as the "HTA of a Medical Guidance App for International Students in the Netherlands" and "A Shared Ownership Model of the Green Corridor." These experiences refined my analytical mindset, stakeholder engagement skills, and the ability to assess innovations from both societal and business perspectives.

Professionally, I worked as a Junior Research Assistant at the Faculty of Biology and as an Assistant at a Contract Research Organization, analyzing different data, preparing documentation, conducting user interviews, offering regulatory insights, and developing the experiment strategy. These experiences taught me how to merge scientific & clinical depth with project management and communication, and improved my managerial and interpersonal skills.

Besides, my internships at Radboud University equipped me with both quantitative (Python, cost-effectiveness analysis, survey) and qualitative (literature review, interview) methods of data analysis. My master's focused on the added value of healthcare innovations and provided me with a clearer understanding of the Dutch healthcare system and stakeholder dynamics. Moreover, it gave me experience in conducting some parts of the thesis in Dutch, which further fuelled me to actively learn the language.

Beyond academics and work, I have consistently developed my interpersonal and organizational abilities through extracurricular activities. I frequently served as a mentor for first-year students, and later, I organized volleyball tournaments for an international group at Radboud campus, which enhanced my teamwork, leadership, and communication skills.

What attracts me most to the Deloitte's Future Organization Team is your commitment to bringing innovative and modern transformative solutions to organizations. I am particularly excited about projects involving operating model transformation and strategic workforce planning because I am passionate about providing value for people & company. In summary, my motivation for helping organizations to transform, combined with my comprehensive education and diverse professional experiences, positions me as a strong candidate for the role of Junior Consultant Future Organization.

Thank you for considering my application. Please feel free to reach out if you have any questions.

Warm regards,
Varvara Lazarenko
