

Dear Tzu Cancer Therapeutics Team,

My name is Varvara Lazarenko, and I would like to express my strong interest in the position of Medical Associate at Tzu. This opportunity resonates deeply with my drive to contribute to meaningful advancements in healthcare, while continuing to grow professionally in the dynamic field of personalized cancer care.

I am a 2024 graduate of the Medical Biology master's program with a specialization in Science, Management & Innovation (SMI) from Radboud University. I am passionate about improving healthcare and science systems through sustainable innovations and cutting-edge solutions. Throughout my academic and professional journey, I have consistently focused on translating scientific insights into tangible healthcare solutions, and I am eager to continue contributing to this transformative mission.

My academic background equips me with a solid foundation for this role. Having finished a bachelor's in Biology and a master's in Medical Biology, I gained in-depth knowledge in the biomedical field and developed a critical understanding of medical technologies, pharmaceuticals, and healthcare challenges. During my Master's thesis at HAN University, I explored the clinical utility of home telemonitoring for elderly patients, an experience that strengthened my ability to collaborate with both clinicians and patients in a research setting.

In addition to my academic qualifications, my professional experience will be a significant advantage for working at Tzu Cancer Therapeutics. As a Junior Research Assistant at the Faculty of Biology and an Assistant at a Contract Research Organization, I contributed to experiment design, clinical trial preparation, medical writing, and regulatory strategy for pharmaceutical development. These experiences gave me a practical understanding of the drug development pipeline and its operational challenges.

This role emphasizes initiating collaborations with clinical partners and exploring biotech alliances, which fits perfectly with my profile. I am confident in presenting complex ideas to diverse audiences, from scientific peers to potential business stakeholders, and I take ownership of my work. I bring a proactive, analytical mindset and a track record of adapting quickly in interdisciplinary teams.

I am genuinely excited about the opportunity to contribute to Tzu's mission and would welcome the chance to discuss how my experience and drive could support your growth.

Thank you for considering my application. Please feel free to reach out if you have any questions.

Warm regards,
Varvara Lazarenko
