

Dear Deloitte Strategy, Risk & Transactions Advisory Team,

I am writing to express my interest in the position of Consultant Regulatory Sustainability Advisory in the Financial Sector at Deloitte. With a Master's degree in Medical Biology from Radboud University and a specialization in Science, Management and Innovation (SMI), I bring a unique perspective that bridges sustainability, innovation, and regulatory frameworks. I am excited to apply my analytical mindset and multidisciplinary experience to help financial institutions align their sustainability strategies with new regulations and long-term impact.

My academic background equips me with a solid foundation for this role. Having finished a bachelor's in Biology and a master's in Medical Biology, I gained extensive knowledge in the field and developed a critical mindset. Through the SMI track in the second year of my master's, I gained deep expertise in sustainable innovation management, sustainable development goals, health technology assessment (HTA), market research, and health economics. This knowledge was reinforced by hands-on experience in real-world projects such as "A Shared Ownership Model of the Green Corridor" and "A Circular Alternative to Single-Use Cups Within the Dutch Train System." These experiences sharpened my skills in stakeholder engagement, societal value analysis, and translating regulatory standards into practical, impactful strategies.

Professionally, I have worked in both academic and industry settings. At a Contract Research Organization, I assisted in the design and documentation of clinical trials, conducted user interviews, and analyzed data with regulatory requirements in mind. My experience as a Junior Research Assistant and an intern at HAN University further trained me in both qualitative and quantitative methodologies, including interviews, cost-effectiveness analyses, and cohort simulations. These experiences provided me with a clearer understanding of stakeholder dynamics and improved my soft skills.

Beyond academics and work, I have consistently developed my interpersonal and organizational abilities through extracurricular activities. I frequently served as a mentor for first-year students, and later, I organized volleyball tournaments for an international group at Radboud campus, which enhanced my teamwork, leadership, and communication skills. Moreover, my ongoing efforts to improve my Dutch fluency reflect my commitment to fully integrate into the professional environment in the Netherlands.

I am particularly drawn to Deloitte's mission of driving meaningful sustainability outcomes while navigating complex regulatory environments. Projects such as ESG risk assessments and EU Taxonomy compliance align perfectly with my academic and professional journey. I see sustainability not just as a regulatory challenge, but as a chance to improve business models in a way that benefits both society and long-term success.

In summary, my motivation to support financial organizations in developing effective sustainability strategies, combined with my comprehensive education and diverse professional experiences, positions me as a strong candidate for the role of Consultant Regulatory Sustainability Advisory in the Financial Sector.

Thank you for considering my application. Please feel free to reach out if you have any questions.

Warm regards,
Varvara Lazarenko
