

Dear McKinsey & Company,

My name is Varvara Lazarenko, and I would like to express my interest in applying for the position of Business Analyst.

From the moment I discovered this position, I felt it aligned perfectly with my career aspirations and my decision to focus on the societal aspects of life sciences. I am a recent graduate of the Medical Biology master's program with a specialization in Science, Management & Innovation (SMI) from Radboud University. I am passionate about improving healthcare through sustainable innovations that effectively meet the needs of patients and medical professionals while being cost-effective. That is why I am thrilled about this opportunity to tackle the challenges of various healthcare stakeholders, contributing to a healthier future for society.

My academic background equips me with a solid foundation for this role. Having finished a bachelor's in Biology and a master's in Medical Biology, I gained extensive knowledge in the field and developed a critical understanding of different medical technologies, pharmaceuticals, and biomedical challenges. During the SMI track in the second year of my master's, I gained valuable insights into digital healthcare, health technology assessment (HTA), market research, business models, value propositions, and health economics, covering healthcare systems of different countries such as the Netherlands, the US, the UK, Germany, etc.

In addition to my academic qualifications, my professional experience will be an asset in the role of Business Analyst. As a Junior Research Assistant at the Faculty of Biology and an assistant at a Contract Research Organization, I gained substantial experience in investigating literature, designing and organizing experiments & user tests, developing clinical documentation, analysing data, and ensuring compliance with client requirements. These roles deepened my understanding of the scientific, healthcare, and pharmaceutical landscapes as well as improved my managerial and interpersonal skills.

Besides, my master's thesis at HAN University of Applied Sciences provided me with valuable experience in both qualitative and quantitative methods of social science research. Moreover, I needed to use Dutch to complete some parts of the thesis, which motivated me to start actively learning the language since then, and I aim to speak it freely (at the B2 level at least) within less than a year. Furthermore, during my SMI track, I had the opportunity to work on real-world projects such as "HTA of a Medical Guidance App for International Students in the NL" and "A Shared Ownership Model of the Green Corridor." These experiences greatly enriched my understanding of stakeholder collaboration and honed my skills in presenting and engaging audiences effectively.

In summary, my strong motivation for connecting science and society, combined with my comprehensive education and diverse professional experiences, positions me as a strong candidate for the Business Analyst role.

Thank you for considering my application. Please feel free to reach out if you have any questions.

Warm regards,
Varvara Lazarenko
