

Dear Debye Institute for Nanomaterials Science,

My name is Varvara Lazarenko, and I would like to express my interest in applying for the position of Coordinator of Operations.

I am a recent graduate of the Medical Biology master's program with a specialization in Science, Management & Innovation (SMI) from Radboud University. I am passionate about improving science, healthcare and education systems through sustainable innovations and research, making it as cost-effective as possible. That is why I am very excited about this opportunity to oversee the operations within the Institute from financial and business management to communication strategy while maintaining organized workflow.

My academic background and professional experience equip me with a solid foundation for this role. Having finished a bachelor's in Biology and a master's in Medical Biology, I gained extensive knowledge not only within my field, but also about university and research environment. Additionally, during my studies I frequently volunteered for mentoring the first-year students and later on organized volleyball tournaments on campus, which has reinforced my passion to help people and enhanced my ability to communicate effectively.

As a Junior Research Assistant at the Faculty of Biology and an assistant at a Contract Research Organization, I acquired substantial experience in project management, writing academic papers and progress reports, preparing clinical documentation, applying for grants, and ensuring compliance with client requirements across different projects. Diligence, attention to details, strong organizational and communication skills were a must-have at these positions.

Furthermore, during my SMI track, I collaborated with fellow students and organizations in Nijmegen (including the municipality of Nijmegen) on real-life projects such as "Health Technology Assessment (HTA) of a Medical Guidance App for International Students in the NL" and "A Shared Ownership Model of the Green Corridor." Besides, my master's thesis at HAN University of Applied Sciences involved analysis of home telemonitoring technology via the HTA framework, which included working with elderly patients and medical professionals and performing cost-effectiveness analysis. This enriched my experience with stakeholder collaboration even further. Moreover, the thesis gave me experience of conducting some parts of the thesis in Dutch, which further fuelled me to actively learn the language.

In summary, my diverse skills, combined with my comprehensive education and various professional experiences, position me as a strong candidate for the Coordinator of Operations role. I believe this is a perfect position for me because I enjoy communicating with different stakeholders and coordinating the processes within a scientific community.

Thank you for considering my application. Please feel free to reach out if you have any questions.

Warm regards,
Varvara Lazarenko
