

Dear Deloitte Audit & Assurance Team,

I am writing to express my interest in the position of Accountant in Training, Audit in Rotterdam. With a Master's degree in Medical Biology from Radboud University and a specialization in Science, Management and Innovation (SMI), I bring a unique perspective that bridges analytical thinking, regulatory awareness, and an eagerness to grow in the dynamic world of audit. I am excited about the opportunity to apply my skills in a structured financial environment and to develop into the kind of accountant who shapes the future of the profession.

My academic background equips me with a solid foundation for this role. Having finished a bachelor's in Biology and a master's in Medical Biology, I developed a critical and analytical mindset. Through the SMI track in the second year of my master's, I gained deep expertise in sustainable innovation management, health technology assessment (HTA), market research, and health economics. Having worked on real-world projects such as "A Shared Ownership Model of the Green Corridor" and "HTA of a medical app", I got invaluable experience in interpreting complex data, stakeholder engagement, and aligning innovations with both societal value and regulatory standards. These experiences taught me to approach problems with curiosity and critical reasoning, while staying detail-oriented and outcome-driven.

Professionally, I have worked in both academic and industry settings. At a Contract Research Organization, I assisted in the design and documentation of clinical trials, conducted user interviews, and analyzed data with regulatory requirements in mind. My experience as a Junior Research Assistant and an intern at HAN University further trained me in both qualitative and quantitative methodologies, including interviews and cost-effectiveness analysis. These experiences reinforced my ability to extract insights, manage large datasets, and communicate findings clearly.

Beyond academics and work, I have consistently developed my interpersonal and organizational abilities through extracurricular activities. I frequently served as a mentor for first-year students, and later, I organized volleyball tournaments for an international group at Radboud campus, which enhanced my teamwork, leadership, and communication skills. Moreover, my ongoing efforts to improve my Dutch fluency reflect my commitment to fully integrate into the professional environment in the Netherlands. My adaptability, cultural awareness, and drive to deliver value in collaborative environments position me well to thrive at Deloitte.

I am particularly enthusiastic about Deloitte's Audit Bright Development Program. The opportunity to gain experience across industries, while developing both technical and soft skills, fits perfectly with my commitment to continuous learning and personal growth. I am especially motivated by the chance to explore strategic areas like sustainability reporting and data analytics, which align closely with my background and interests.

In summary, my diverse academic background, analytical capabilities, and motivation to grow in the audit profession make me a strong candidate for the Accountant in Training role.

Thank you for considering my application. Please feel free to reach out if you have any questions.

Warm regards,
Varvara Lazarenko
