

Dear Wageningen University & Research,

My name is Varvara Lazarenko, and I would like to express my interest in applying for the position of the Business Developer Biotech Booster.

From the moment I discovered this position, I felt it aligned perfectly with my career aspirations and my decision to focus on the business aspects of life sciences. As a recent graduate of the Medical Biology master's program with a specialization in Science, Management & Innovation (SMI) from Radboud University, I am excited about the opportunity to contribute to WUR's and Biotech Booster's mission of advancing healthcare solutions. I am passionate about improving healthcare by transforming scientific knowledge into sustainable biotech innovations that benefit patients, medical professionals, and society.

My academic background equips me with a solid foundation for this role. Having finished a bachelor's in Biology and a master's in Medical Biology, I gained extensive knowledge in the field and developed a critical understanding of various biotech technologies and challenges. During the SMI track in the second year of my master's, I gained valuable insights into digital healthcare, health technology assessment (HTA), market research, business models, value propositions, and health economics through courses such as Future of Health, Methods of Societal Research, Sustainable Innovation Management, and How Health Systems Work.

In addition to my academic qualifications, my professional experience will be an asset in the role of the Business Developer Biotech Booster. As an assistant at a Contract Research Organization, I developed clinical trial documentation, conducted pharmaceutical user interviews, and ensured compliance with client requirements across different projects. This experience provided me with a deep understanding of the MedTech and pharmaceutical industries, as well as improved my managerial and interpersonal skills. Furthermore, during my SMI track, I had the opportunity to collaborate with fellow students and organizations in Nijmegen, including the municipality, on impactful real-world projects such as "HTA of a Medical Guidance App for International Students in the NL" and "A Shared Ownership Model of the Green Corridor." Through these experiences, I gained valuable skills in market research, business strategy development, cost-effectiveness analysis, and various other aspects of HTA. My master's thesis at HAN University of Applied Sciences on the added value of home telemonitoring technology enriched my experience in HTA and stakeholder collaboration even further.

In summary, my strong motivation for business development within biotech field, combined with my comprehensive education and diverse professional experiences, positions me as a strong candidate for the Business Developer Biotech Booster role. I am eager to connect science with societal needs and contribute to WUR's impactful work.

Thank you for considering my application. Please feel free to reach out if you have any questions.

Warm regards,
Varvara Lazarenko
