

Dear Advanz Pharma Hiring Team,

My name is Varvara Lazarenko, and I would like to express my great interest in the position of Medical Science Liaison. This opportunity resonates deeply with my drive to contribute to meaningful advancements in healthcare, while growing professionally in the dynamic field of clinical research.

I am a 2024 graduate of the Medical Biology master's program with a specialization in Science, Management & Innovation (SMI) from Radboud University. I am passionate about improving healthcare & science systems through sustainable innovations and cutting-edge solutions. I thrive in a fast-paced environment where I can interact with different healthcare stakeholders like hospitals, insurance companies, and healthcare professionals and work on clinical research, contributing to a healthier future for society.

My academic background equips me with a solid foundation for these roles. Having finished a bachelor's in Biology and a master's in Medical Biology, I gained in-depth knowledge in the biomedical field and developed a critical understanding of medical technologies, pharmaceuticals, and healthcare challenges. During my Master's thesis at HAN University, I explored the clinical utility of home telemonitoring for elderly patients, an experience that strengthened my ability to collaborate with both clinicians and patients in a research setting.

In addition to my academic qualifications, my professional experience will be a significant advantage for working at Advanz Pharma. As a Junior Research Assistant at the Faculty of Biology and an assistant at a Contract Research Organization, I gained substantial experience in writing academic papers, designing experiments, preparing clinical documentation for phase I, II, and III trials, analysing data, advising on regulatory trial requirements, and ensuring compliance with client specifications. These roles deepened my understanding of both the scientific and practical aspects of healthcare development and further improved my managerial and interpersonal skills.

What excites me most about this opportunity is the chance to engage directly with healthcare professionals, contribute to the scientific credibility of a forward-thinking company, and support impactful medical strategies across diverse therapeutic areas. I am fluent in English and am actively improving my Dutch. My willingness to travel and genuine enthusiasm for bringing scientific innovations to the clinical setting make me a strong match for this role.

With a strong passion for science-driven healthcare solutions, a proven ability to engage stakeholders, and a continuous drive to learn, I am confident I would be a valuable addition to your medical team.

Thank you for considering my application. Please feel free to reach out if you have any questions.

Warm regards,
Varvara Lazarenko
