

Dear MIA,

My name is Varvara Lazarenko, and I would like to express my interest in joining the restaurant crew at MIA.

I am a 2024 graduate of the Medical Biology master's program with a specialization in Science, Management & Innovation (SMI) from Radboud University. During my SMI track, I collaborated with fellow students and organizations in Nijmegen (including the municipality of Nijmegen) on real-life projects such as "Health Technology Assessment of a Medical Guidance App for International Students in the NL" and "A Shared Ownership Model of the Green Corridor." These projects enhanced my soft skills, teamwork abilities, and presentation skills. My master's thesis at HAN University of Applied Sciences focused on the added value of home telemonitoring technology, further enriching my experience with stakeholder collaboration. Additionally, conducting parts of my thesis in Dutch motivated me to actively learn the language.

Throughout my studies, I frequently volunteered to mentor first-year students and later organized volleyball tournaments on campus. These experiences reinforced my passion for helping others and enhanced my ability to communicate effectively.

My professional experience will also be a valuable asset for the job. As a Junior Research Assistant at the Faculty of Biology and an Assistant at a Contract Research Organization, I acquired substantial experience not only in developing academic papers and clinical documentation, but also in engaging with clients across different projects. Diligence, attention to details, high organizational and communication skills were essential at these positions.

In summary, my diverse skills, combined with my comprehensive education and various professional experiences, position me as a great fit for MIA. I thrive in environments that require interaction with people, and I am always eager to embrace new challenges and learn.

Thank you for considering my application. Please feel free to reach out if you have any questions.

Warm regards,
Varvara Lazarenko
